## Claims

1. I Claim: Barbecue Pit that can be used and operated in the same manner as a typical barbecue pit with two side walls, one rear and front wall with cooking rack on top of the enclosure. At a fixed distance below the cooking rack you have firebox with grate for holding charcoal that is centered in the middle of firebox with small layer of water in the bottom of firebox. The firebox can be pulled from pit enclosure in a drawer-like manner or completely removed from the pit enclosure.

2. The pit of claim 1 the firebox <sup>pulled</sup> ~~pulled~~ from pit enclosure, for adding more charcoal or spreading your charcoals for better control.

3. The pit of claim 1 the firebox can be completely removed in a drawer-like manner from pit enclosure to cover charcoal with water to put the fire out, and for cleanup.

4. The pit of claim 3. To cover charcoal with water you can remove the charcoal grate from firebox by lifting charcoal grate from firebox by one end of grate <sup>so</sup> ~~some~~ your charcoals can drop to the bottom of firebox.
